- Bootstrap

Work Experience

2023 January -

Upwork
Frontend Developer

I am looking for new and remote job options using Html Css Javascript React. I want to develop myself and network with the works I will do here.

2023 March - 2023 April

Yaska Group
Junior Frontend Developer

To create and maintain https://review-4you.com/ and https://biquadratmarketing.com/ websites together with our teammates using Html Css javaScript and Bootstrap. Here I used different html features and javascript libraries.

2022 September - 2023 February

Kartega Innovative
Junior Frontend Developer - İntern

My first job experience was to create the www.dilekiste.com website using React. My task was to write the style codes in the given components. Here, a site was created for customer needs for wholesale purchases. The project also had a mobile app.

2022 September - 2022 December

Bilge Adam Akademi
Trainer Asistant

During the "Frontend training", I worked as an assistant trainer in the last stages of my education.

Language

English Pre-Intermediate

Courses

○ **2022 May - 2022 December**
Bilge Adam Akademi
Frontend Development & React.Js

· HTML, CSS and JavaScript and React.Js wereused for projects with responsive design.
· Received mentorship from senior developers.Their feedback was applied consistently.
. Tracked user stories/bugs in GitHub projects.
.The spelling rules of the software languagesused in the projects were complied with.
. In e-commerce projects, product listing,product filtering, product creation and front-end coding of the API side were developed.

My Personal Work

○ **2023 March**
www.cwhesaplama.net
Co-founder and frontend developer

www.cwhesaplama.net is an adaptation of a calculation method used in transportation to a website. This site is generally targeted at computer and tablet users. I used react and MDBootstrap while building this site. From time to time, I make improvements and updates based on user feedback.This was the first site where I bought the domain name and made the hosting settings.
